

Francesco Moca

Full-Stack Developer & IT Consultant · Milan, Italy

francesco.moca@gmail.com github.com/franzmoca linkedin.com/in/francesco-moca francescomoca.ml

SUMMARY

Full-stack developer and IT consultant with 5+ years of experience delivering enterprise software in blockchain-heavy and regulated contexts. I work across backend APIs and services, frontend applications, smart contracts, DevOps, and technical analysis, and I am comfortable moving between hands-on implementation, client-facing consulting, team coordination, and architecture support.

EXPERIENCE

Blockchain Reply

Mar 2020 – Present

Full-Stack Developer / Blockchain Consultant · Milan, Italy

Designed and delivered 13+ enterprise projects for clients in financial services, energy, insurance, supply chain, payments, and digital entertainment. My role has varied by phase: full-stack developer, technical lead, on-site consultant, and architecture support.

- Built blockchain components in **Solidity**, **Go**, and **PyTeal** across Polygon, Hyperledger Besu, Hyperledger Fabric, R3 Corda, and Algorand environments.
- Developed backends and integration layers in **Java / Spring Boot**, **Go**, and occasionally **Python** for token lifecycle management, digital asset issuance, and DeFi-style platforms.
- Built frontend applications with **Vue.js 2/3**, **React**, and **Next.js**, including operational dashboards, marketplaces, tokenisation portals, and exchange interfaces.
- Worked on infrastructure and operations with **Kubernetes**, **AWS**, **Terraform**, **CloudFormation**, and **Serverless Framework**, including Hyperledger Fabric network orchestration.
- Integrated institutional custody solutions such as **Gnosis Safe** and **Fireblocks** for regulated asset-management workflows.
- Curated delivery workflows beyond implementation: CI/CD pipelines with **Jenkins**, **GitLab CI**, and **GitHub Actions**, plus technical analysis, architecture documents, client workshops, migration planning, mentoring junior developers, and pre-sales proposals.

Freelance Developer

Sep 2016 – Feb 2020

Freelance Full-Stack / Mobile Developer · Remote

Delivered client projects alongside university studies, including an ERC-721 system with a React web dashboard and React Native mobile app for product authenticity, and a cross-platform board game companion app shipped on the iOS App Store and Google Play.

SKILLS

Languages	Java · Go · Python · TypeScript · JavaScript · Solidity · PyTeal
Backend	Spring Boot · Go · Python · Node.js · Keycloak · Serverless Framework
Frontend	Vue.js 2/3 · React · Next.js · React Native · Quasar · Vuetify · Ionic
Blockchain	Ethereum / EVM · Algorand · Hyperledger Fabric · Hyperledger Besu · R3 Corda · Polygon · Gnosis Safe · Fireblocks

Infrastructure	Kubernetes · AWS (ECS, EKS, Lambda) · Terraform · CloudFormation · Jenkins · GitLab CI · GitHub Actions · Ansible · Docker
Data	PostgreSQL
Delivery	Technical analysis · Architecture documentation · Client workshops · Team coordination · Mentoring · Pre-sales support

EDUCATION

Master's Degree in Computer Science (Software Techniques) 2016 – 2019

University of Bologna · 110/110 con lode

Thesis: *Pig — A State Channel Game on Ethereum*. Implemented the dice game Pig as a trustless Layer 2 application using counterfactual instantiation: players exchange signed state updates off-chain and settle only the final outcome on-chain, reducing blockchain interactions to two transactions per game regardless of length.

Bachelor's Degree in Computer Science 2013 – 2016

University of Perugia · 105/110

Thesis: *Blockchain: gestione di Big Data*. Analysis of the Bitcoin blockchain as a large-scale distributed data structure, with an interactive force-directed visualisation of transaction graphs built in D3.js to explore value-flow patterns between addresses.

CERTIFICATIONS & LANGUAGES

Professional Scrum Developer I (PSD I)
